Standard pipe cutter

Ref.	Description
IITTE402E	16-42 mm stainless steel blade, body in aluminium

Standard pipe cutter with body in aluminium and blade in HRC52-58 stainless steel.

Functions and technical specifications

- Quick and precise cutting
- Facilitates pipe insertion into compression couplings
- Ratchet operation
- Safety hook
- For PVC and PE pipes up to 42 mm
- In blister packs with barcode

Professional pipe cutters

Ref.	Description
IITTP428	16-42 mm stainless steel blade, body in aluminium
IITTP430	16-64 mm stainless steel blade, body in aluminium

Professional pipe cutters for intense and ongoing use, with aluminium body and HRC52-58 stainless steel blade.

Functions and technical specifications

- Quick and precise cutting
- Facilitates pipe insertion into compression couplings
- Non-slip handle
- Ratchet operation
- Safety hook
- For PVC and PE pipes up to 42 or 64 mm
- In blister packs with barcode

Tube cutter for small diameters

Ref.	Description
IITTE404J	20 mm tube cutter

Tube cutter for mini pipes and driplines with body in ABS and blade in steel.

Functions and technical specifications

- Quick and precise cutting
- Ideal for mini pipes, driplines and twist-proof pipes
- Spring return
- Safety hook
- For PVC and PE pipes up to 20 mm

Drip-clip for dripper installation

Ref.	Description
IIPDR00000000	drip-clip for drippers

The drip-clip allows simple, fast installation without leaks. In two steps, it allows the hole to be punched and the dripper to be positioned.

Functions and technical specifications

- For drippers 16 to 23 mm ø
- For installation on pipes in PE 16 and 20 mm
- Skills or training not required
- Can be used to install self-perforating drippers
